### **DETAILED ACTION**

This office action is in response to the filing of the application papers on 13 December 2003. Claims 1-36 are pending.

#### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-25, drawn to an evaluation method, classified in class 324, subclass 769.
- II. Claims 26 and 27, drawn to a method of manufacturing, classified in class 438, subclass 15.
- III. Claims 28-32, drawn to an article, classified in class 257, subclass 48.
- IV. Claims 33-36, drawn to a program, classified in class 702, subclass 127.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II, III and IV are related as product, process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the product can claimed can be made without the calculating the misalignment of the mask as required by the process claims.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
